### **DETERMINATION OF NONSIGNIFICANCE (DNS)**

**Name of Proposal:** WEST FOSTER CREEK HEADCUT STABILIZATION PROJECT

**Description of Proposal:** On Wells Wildlife Area:

WDFW propose to use an excavator to place woody debris in West Foster Creek bottom below and against the headcut to slow its retreat upstream. WDFW will use limbs and branches of Russian olive trees no greater than eight inches in diameter as well as "Christmas tree size" pine trees from a local timber thinning project. This material will slow the water flow thus increasing sediment deposition which will build up the streambed above and below the headcut. WDFW will plant willow cuttings and grass seed in and around the woody debris. All areas disturbed as a result of construction will be revegetated with native species of shrubs, trees and grass.

**Proponent/Applicant:** Washington Department of Fish and Wildlife, Wells Wildlife Area
